Kris Shepherd
AC Environmental
Edmonton, AB

Dear Mr. Shepherd:

I would like to personally thank-you and your organization for providing us the opportunity to use your Smart Bond products for our environmental projects. I, along with my clients were very impressed with the polymer products in general recognizing the efficiency of applying the products along with the cost savings related to disposal.

Our company has used your product on numerous response calls, and stocks it in our warehouse for mitigation and remediation. I bring attention to the latest response in which you personally assisted with a product that is unfamiliar to most, 100% Naphtha, which spilled out of a tank farm in Ft. McMurray, AB. I would like to recognize your efforts in accompanying me to the site and working with all parties to mitigate the volatile product. We were delighted with the support and resources available to us with all aspects of the products. The products worked famously and will now be utilized by us and the client as a first defense mitigation product for future spills of hydrocarbons on their sites.

The products, if they were available to me at the time, would have saved a lot of time and money at the 2005 CN derailment at Wabamun Lake, AB. I would have preferred to use your products contrary to other methods that were recommended to me and fellow colleagues as then we would not have been on the project for over three months. On both small and large scale applications, I see Smart-Bond as the best option for cleanup as it is easy to apply and very easy to remove due to its solidified nature.

Thank-you for your continued support and I want to wish you continued success with the products and am pleased to say that we will continue to use, stock and recommend them to our clients and colleagues.

Sincerely,

A handwritten signature in black ink, appearing to read "Wayne Rose". The signature is stylized with loops and a long horizontal stroke at the end.
